

	Respondent ID	Start Date	What is your favorite place in Adams County?	Do you have any concerns about new wind farms in Adams County?	Do you have any concerns about new solar farms in Adams County?	What aspects of wind farms should be regulated in Adams County?	What aspects of solar farms should be regulated in Adams County?	Who are the stakeholders we should interview for the Renewable Energy Chapter?
			Open-Ended Response	Open-Ended Response	Open-Ended Response	Open-Ended Response	Open-Ended Response	Open-Ended Response
1	1.14498E+11	2023-12-29 18:40:22	Lake Icaria	Bird/wildlife impact, sustainability	None - it would be great if they were high enough off the ground to farm or graze under	Material used (sustainable or recyclable materials, color for bird/wildlife protection), noise output, cash flow to the community. There are new tulip (and other) shaped turbines that may be alternative options for locations with concerns.	Height off the ground to maximize use of the ground for farming or grazing, cash flow to the community	Local community, local government, educational interests (colleges or universities with majors related). Wind energy in other countries could be consulted for best-practices if other states aren't an option.
2	1.14498E+11	2023-12-29 16:57:39	Lake Icaria	No	No	No more regulations than livestock (i.e. hog barns)	No more regulations than livestock (i.e. hog barns)	Local community, project team, government, schools
3	1.14498E+11	2023-12-28 21:35:41	Icaria and Primrose	No	No	None	No	Only those who are in the immediate area of the wind farm
4	1.14497E+11	2023-12-28 19:22:09	Lake Icaria	No	No	No closer than 900 ft to a house unless wanted	None	Landowners and neutral parties
5	1.14497E+11	2023-12-28 19:17:38	Lake Icaria	Yes	Yes	Distance from farm/home building sites	The number of acres that they can be built on	The most interested or who would be interested in having them on their properties
6	1.14497E+11	2023-12-28 19:15:35	Lake Icaria Where we live	Yes. No more wind farm expansions. Adams county must be preserved as an agricultural county.	Yes. No more solar farms	Setbacks from property lines must be increased and those who do not want windmills must also be considered	No more expansion of solar farms as it takes up agricultural land	The landowners and citizens of Adams county as well as the Adams county priceless land coalition
7	1.14497E+11	2023-12-28 15:52:33	On our farm Second favorite is Corning Main Street (primrose and Fire&Salt	No concerns I believe that wind energy can be a huge benefit to Adams County, providing huge financial benefit to landowners and much larger property tax income for Adams County	I have no concerns about Solar farms, especially if the land under the solar panels has an Agricultural use. (grazing, or a compatible crop)	Distance: 1250 feet from a dwelling 600 feet from a property line unless neighboring landowners agree to less than 600 feet. There should be bonding finance to decommission a wind farm	600 feet from a dwelling 100 feet or less from property lines	Only Adams County Iowa land owners in the immediate area (footprint) of the wind or solar farm. Adams County Supervisors, treasurer, auditor, Possibly Iowa Economic Development Authority, other Counties who have experience with renewable energy farms.y
8	1.14497E+11	2023-12-28 15:59:06	Country views, nature	the noise, general aviation requirements and degradation of roadways during construction and several years afterward,, wind turbine blade replacement storage of waste and Adams county should reap the rewards of renewable energy first, ie cheaper utilities and Tax breaks.	Glare for aircraft and waste of solar panels	All aspects from construction to usage of utilities should benefit the residents of the county first and foremost	All aspects from construction to usage of utilities should benefit the residents of the county first and foremost	the neighbors of landowners that want the wind and solar farms should have a say on what they have to deal with while not being able to reap the benefits of not having them.
9	1.14497E+11	2023-12-28 15:49:08	My home and farms in Adams County	Wind farms are a big hoax where companies profit at the expense of citizens who are forced to accept infringements on their rights. Have a county-wide vote and see what the citizens want that you are supposed to represent. You are to speak for the majority.	Yes, same as my response to question #2 above	There should be no more wind farms to have to regulate. No more turbines!!	No more wind farms	We are all stakeholders and there should be a county-wide vote taken of all citizens to see if we should even pursue further talks. We are an agricultural area and it should remain that way. If we become industrial, very few citizens would profit, most citizens would suffer, and the wind companies would profit big time .
10	1.14497E+11	2023-12-28 13:48:10	My house on my farm.	Yes	Yes	3280 ft from property line, limit height to 400 ft, limit products to those produced in the United States by US companies that have no ownership component related to China. No subsidies or tax incentives.	No ag land taken out of production for solar farms. Set backs at least 3280 ft from property lines. Limit products to those produced in the United States by US companies that have no ownership component related to China. No subsidies or tax incentives.	The people that won't come back because of the negative consequences that these sources produce.

11	1.14497E+11	2023-12-28 10:57:30	lounging in my backyard and the seat of my tractor	yes	yes	SETBACK of at least 3280 ft from the property line (neighbor can sign off to make this less) Height cap of 600 ft. Quantity cap of 200 units. Decommissioning Plan (funded) No tax incentives. Set Safety Standards, including procedures and funding for environmental cleanup due to leaks and fires. County needs to be reimbursed for damage done to county property. Equalization plan for non participating residents for decreased land values. Reimbursement plan for non participating resident's homes that can no longer be comfortably lived in. Cable depths to minimize erosion. Set regulations in a way to protect landowners who signed up prior to understanding what they were giving up, and to keep Adams County residents good neighbors.	Please protect our safety. Cable depths, overall size of project. Keep in mind that roughly 80% of solar components are manufactured in China using slave labor and is obscenely subsidized by the American Taxpayer!	both participating and non participating landowners. resident, non property owners. our young adults who had planned on returning to Adams Co to raise their families, but do not want to have their view from the backyard be a humming, flickering, obstructed view of God's beautiful landscape.
12	1.14497E+11	2023-12-28 12:20:54	The landscape of ag land	Yes they destroy our roads take the best part of good farms and split them up with there roads and come back every 5-10 years and tear them up again when they update them.	Yes they should not go on good productive ground if there gonna do them	Setbacks from houses/building need to be farther. We have homes in the country for the reason of peace and quiet and to live where it's farm land not solar farms or wind turbines	Size and setbacks.	The farmers and families that live in the county and they have families that contribute to the community. Outside investors should have no say when they don't have to live by them.
13	1.14497E+11	2023-12-28 11:55:56	Our home and lake Icaria	Yes. Our county must stay agricultural rather than industrial. No more expansion for wind farms	Yes. No more solar farms	Setbacks from property lines need to be increased to a mile. Consideration for the non participant is a must.	No expansion. Expansion takes up farm land.	Adams county priceless land coalition. The landowners and citizens of Adams county.
14	1.14497E+11	2023-12-28 10:40:38	Lake Icaria	Yes. See comments.	Yes	There must be rules on set back and the number of windmills that a land owner can have.	There must be rules on set back and the number of solar panels.	All farmers in Adams County. There is no reason for elected officials to no personally contact each land owner/farmer. There are 5 board of supervisors to do this, there is only 3600 people in the county! It is shameful what has transpired the last few months and years with the windmills. Windmills do no good for anyone in Iowa. Property values are going down and acreages can't be sold due to the negligence of the elected officials.
15	1.14497E+11	2023-12-28 09:11:40	Lake Icaria and the county's rolling hills/cropland	Yes I have real concern for a change in zoning from agricultural to industrial. We are a farming community. We need our farm families to be able to stay in farming -- and living in Adams County. At last count, I thought there were approximately 150 windmills either up or to be built in the near future. That is taking a very large number of acres out of production in our county ... acres our farmers can no longer farm. We are all aware that farmers need volume to succeed in these times.	Yes	Setbacks from homes AND property lines of non-participants (i.e., flicker, noise, documented health problems, quality of life issues, ice forming on blades and being thrown long distances, etc.) How and who will be responsible for windmills being dismantled when their life is done, etc.? Other concerns are height limits, as well as the number of windmills allowed in the county. How many is enough? The current 250 limit seems EXTREMELY excessive. Those opposing the windmills so near to their property lines and homes are being taken advantage of with the current guidelines; this is NOT the way to treat our residents. They are also taxpayers. It is a shame what is happening in Adams County.	I am concerned about the number of these that are planned. I have not heard about how many are being considered. It seems like there should be a reasonable limit on these also so as not to destroy so much of our Adams County farmland.	Any of the 900 plus people that have signed the petition and have researched these topics extensively. It seems like the people being consulted at this point have conflicts of interest ... being in favor of, already having windmills, or working for wind companies.

16	1.14497E+11	2023-12-28 09:30:01	Lake Icaria	Yes. I believe their needs to be regulations in place that protect the property right, the health, and the well being of the neighbors of the turbines. Also the financial interest of the county would be best served if there is some regulations regarding the removal of the turbines by the companies erecting the turbines when they are no longer in use.	Yes, As an ag community, blessed with great farm land, it seems a shame to destroy the productive farm acres with solar panels.	*Distance from neighbor's property lines; neighbor's who do not want the turbines. *Removal of the turbines by the companies who own them when they are no longer in use. * Number allowed in the county (I think we have reached that limit). * Height of the turbines. If there is no height limit, then increase the setbacks when turbine heights increase	I'm not as familiar with the solar farms. I think run-off is a concern, but they don't seem as intrusive to neighbors as the turbines. My main concern is changing the status of the county from an Agriculture based (zoned) county to an industrial based (zoned) county. At some point in the future that will minimize (or allow more control over) the ability of the farmers to function.	The neighbors to the wind farms and solar farms. Just listing to those who have been vocal would be a step in the right direction. There are over 900 signatures on a petition that obviously have an opinion and could be interviewed. It is obvious the supervisors have an agenda which they are pursuing without regard for those who may oppose their point of view. They have hand selected a zoning board to carry out their agenda, and also seem to not want any interference with their plans.
17	1.14497E+11	2023-12-28 09:17:50	prescott	no expansion	no expansion	all	all	adams county residents
18	1.14497E+11	2023-12-28 08:57:42	The Rural area of the county, particularly the northeast which is getting ruined by wind turbines	Yes, I have serious concerns about both the long term and short term effects of the wind turbine farms and would like to see NO further turbines built in adams county	No, i would prefer to see solar farms vs wind turbines	Wind turbines should not be located as close to homes as they currently are being built. Neighbor permission within 3 miles should be required before any can be built	Need to ensure that no glare will affect neighbors	Landowners/farmers/tenants. Environmental groups, local communities, including the neighbors and people who have no benefit from these being built, which is nearly everyone in the county
19	1.14497E+11	2023-12-28 07:36:46	My home except looking west where the unsitely wind turbins are,	Yes they are obsolete before even being put up	Yes wasting good farm land	Don't put them up won't have to regulate	Don't put them up won't have to regulate.	Land owners
20	1.14497E+11	2023-12-28 07:50:01	My home	Yes, they're are already too many and almost everywhere you look	Yes, they are taking up valuable farm land	Distance to house and number of turbines allowed	Distance to residence and number allowed	
21	1.14497E+11	2023-12-28 07:17:36	My home	Yes. I feel like we need them not only for the electrical benefits also for the taxes they will pay the county	Yes I feel like we need them not only for the electrical benefits but for the taxes they pay to the county	Number of turbines. Distance from your house.	Number of solar farms. Distance from your house	Tax paying citizens
22	1.14497E+11	2023-12-28 06:21:17	Our farm, as well as all rural areas.	Many, health issues, wildlife, lowered land values and destruction of the beautiful landscape.	No expansion.	Setbacks from homes and property lines. Safety for all residents.	Location from those not involved.	Property owners and farmers.
23	1.14497E+11	2023-12-28 06:21:15	Rural area	Yes,they are destroying the beautiful views in the county	Yes destroying valuable farmland	Distance from roads and houses	Not allowed due to taking farmland off market	Farmers and people who live here
24	1.14497E+11	2023-12-27 22:50:43	The timbers near our rural home.	No	No	Probably place a cap on the total number in the county. Enhance decommissioning requirements.	Appropriate road use agreements	participating landowners. agriculture businesses that rely on good infrastructure. economic development organizations. rural residents. energy developers. school officials.
25	1.14497E+11	2023-12-27 20:47:01	My home.	Yes. I don't want to live surrounded by windmills and flashing red lights. Economic development will suffer because others will not want to move here, and our land values may decrease. Over 90% of the existing windmills in Adams County are owned by nonresidents who don't care about the neighbors or the county.	Yes. They need to be limited also.	Setbacks should be increased. The number of wind farms in the county should be limited. Residents should be notified when these wind companies first come into the county to erect new windmills.	There should be regulations about where solar farms can be established so that neighbors are not surrounded by the solar panels. The number of solar farms in the county should also be limited.	ALL Adams County residents. We will all be affected by new solar and wind farms.

26	1.14497E+11	2023-12-27 20:05:12	My home and farm.	No concerns with safety or nuisance at all. This will generate 3 million a year in tax revenue to be shared with the county and schools. A lot of roads and bridges can be repaired and/or reopened. Closed bridges pose a great public safety risk, one major OBJECTIVE issue is greater response time for any emergency in those areas VS subjective nuisance. I would choose PUBLIC SAFETY over any subjective nuisance!!! My neighborhood has a bridge closed that is slated to be repaired in 2028! That creates a huge lag in EMS response time if anyone in this neighborhood should need it. I have not heard any realistic solutions from anyone in opposition of the Wind Farms on how the County will be able to keep up with all the bridge and road repairs/closures we have currently and all the others to be closed in the near future. Maybe they all live on or by a paved road or on a road that has no closed bridges, so they aren't concerned with that??? Public Safety should come first over opposition nuisance topics. Landowners should have the right to do what they want on their land. 2.4 million paid to all participating landowners. These people shop, dine, buy locally, more dollars spent in Adams County! I have no concerns at all, except for the bully tactics by the opposition of this Wind project and all their subjective nuisance issues and them having NO REALISTIC Solution for the county needs.	No	I think the regulations already in place are fine.	N/A	Invenery and any landowners who would like to have wind turbines. Landowners who currently have wind turbines.
27	1.14497E+11	2023-12-27 20:34:00	The view from our east windows	We have enough wind turbines in Adams county	Do we have any regulations on them at the present time?	The number of wind turbines allowed and regulations on their placement.	There should be complete and public regulations before any more solar farms are allowed to be built	All interested residents of Adams county
28	1.14497E+11	2023-12-27 14:21:09	The acreage where I have lived for 35 years	Yes, I feel they may be a very short-sighted solution for increased revenue. I want no further expansion of wind farms!	Why would you put solar farms in the farm belt? Is land and crops not more beneficial? Maybe solar farms in the desert, where the sun shines more than in Iowa.	Who owns these? Who pays for the taxes? Who replaces, repairs or removes these when they wear out? Who takes care of all this when the government decides to no longer subsidize them. No expansion! No more in number and farther away from homes or the property of others.	Regulate the number of farms and their placement. I really don't think solar is the answer for Iowa. Is our latitude conducive for it?	The landowners who would be affected by this. If it's not going to be in your backyard, effecting your health and decreasing the value of your property maybe you shouldn't get to say.
29	1.14497E+11	2023-12-27 14:02:09	Our family farm especially the peace and quiet. My daughter loved to lay in yard at night and look up to see all the stars that we did not see in the city.	Yes. Many are the same as expressed in the Free Press. The first BOS I attended I got the impression many board members had already decided their stance on the issue and didn't want to hear from opponents. I concluded this after observing board members looking through papers and not having eye contact with those speaking. Wind farm corporate representatives invited to speak but minimizing time allowed for opponents to speak. Public opinion needed to be in this decision from the start.	None at this time	Number allowed, location and setbacks, removal when no longer functioning	Locations, number allowed	Landowners, Elected officials in a town hall setting where their constituents are present and able to ask questions and provide input as well.

30	1.14497E+11	2023-12-27 14:20:37	Lake Icaria	As long as landowners want to participate, I think wind and solar are good options at this point and time.	No, as long as landowners are participating voluntarily I have no issues with solar	I feel setbacks from our natural "wildlife" areas are important, and I think a reasonable setback from non-participating landowners in a reasonable consideration	I feel Solar farms are less visual and noise impact on neighbors, so I have less concerns for solar farms.	I feel all residents of Adams County are stakeholders and I think this and public forums are a great way to let everyone provide input. I do feel that there will be opposition that is not willing to look unbiasedly at the benefits to the whole county, and I feel their biased opposition should not be allowed to flood over the opinions of the rest of the county population, even though they are making the most noise. Our elected officials have been elected to represent their share of the county, so in the end I feel it should be left to the Board of Supervisors as our elected officials to have final say, once they have consulted with professionals in the area of Wind and Solar. They will be acting with the guidance of the zoning commission, as well as plenty of public feedback.
31	1.14497E+11	2023-12-27 14:14:20	My home	Yes I hate them	Yes	Not to have any!!	All of them	Land owners
32	1.14497E+11	2023-12-27 14:06:32	My land	No	No	What we have for ordinance is good, need decomission plan	Decomission plan	Cipco, Rec, School Districts, Land Owners signing up their land
33	1.14497E+11	2023-12-27 14:03:21	Out in the countryside.	Yes	Don't think so.	Distance from people's homes.	Distance from people's homes.	Don't know?
34	1.14497E+11	2023-12-27 13:15:50	My Farm	No	No	Decommission plans	Decommission plans	The landowners who will be putting them in, REC, Central Iowa Power Co-Operative, Schools, Main Street, County
35	1.14497E+11	2023-12-27 12:47:47	Golf Course.	No.	No.	Size.	equal opportunity.	Landowners, business owners, and the schools.
36	1.14497E+11	2023-12-27 12:50:33	Golf Course	No	No	Size	Size	Landowners
37	1.14497E+11	2023-12-27 12:19:03	Favorite place WAS my home but now it's surrounded with turbines.	They need to stop expansion. Enough is enough. Our county has been ruined.	We don't need solar. It's bad enough our county is being ruined by turbines, we don't need solar, too.	Turbines never should have been allowed in county in first place. They are not FARMS!!!! Turbines have nothing to do with agriculture.	There shouldn't be any solar in Adams Co. We already have a mess with turbines that have ruined friendships with neighbors, etc.	Stop expansion of turbines then won't need answers to these questions. We have concerns but no one listens anyway.
38	1.14497E+11	2023-12-27 10:42:32	My childhood home/farm now that I own.	Of course! current ordinances (and proposed) favor the developer. If they keep distance ordinances to only 1500 feet they can cram more turbines in our beautiful little county. They decrease acreage values and homes. Particularly, Who would purchase one within earshot of one. (humming, squeaking, vibrating, etc.) who would purchase one with a turbine (or several) blocking views, shadow flicker, etc? Why do people want to live here? For beautiful views, peaceful and quiet surroundings, NOT turbines. I'm concerned about land vales for all farmland and acreages. 120 turbines are enough. No one is going to take the current \$1.7 million county getting now. It is just greed for wanting more, not whether they're helping save the environment. What a joke. I'm always concerned when I hear " it brings in new jobs". All construction workers and material/supplies are brought in the county. Cooneys with their porta potty business along with restaurants and Caseys and maybe hotel usage are temporary. The only local job left is maintenance people which for Adams county is four men (I think). Two of whom do not live in the county thus taking business, tax dollars and possibly kids out of our county.	Just don't even start with them. We are an agricultural state/county. Quit covering up food producing land with this garbage. Corn. corn, corn provides food for livestock thus food for people, provides for ethanol for clean air, and is the best converter of CO2 to oxygen in the world> The whole idea of less corn production is just absurd.	SETBACKS! If Adams county is ignorantly and blatantly going to not have ordinances without including height caps, how could you ever have them anywhere near a home? You cannot set back a turbine after you retrofit one with higher heights. I know of at least four families who have moved from the project area SE of Corning. What happens when they up the height on those? more people moving and no one moving in. Why such a high number for decibels? Set them low. For goodness sake they're loud now. A bigger turbine is going to be louder! Why not have a hard copy of the bird and bat studies done on file at the engineer's office along with road use agreements and other studies done? Why isn't that standard? So they won't be accountable for those wildlife studies actually being done? The county should request that so people can see them, especially since that is a huge concern for many people. And make the setbacks from property lines not homes! I should not make money off my neighbor's land. Make my land make money for me, not my neighbors. That's another absurdity.	The setbacks for solar should be at least a half mile also. They should not cover land with a CSR higher than 70. Why are we covering ANY highly productive ag land?!	Is the general public considered a stakeholder? If not, they should be. They are the largest group these farms affect. Big corporations who are out for a profit disguised as "environmentally friendly" should not be interviewed. A few landowners who want these farms should be , while remembering they too are out for profit, not what is best for the entire county. I have listened to local Farm Bureaus, and a recent online workshop to help with understanding these easements, what a joke. Clearly not supporting and protecting landowners from these deceptive agreements.
39	1.14497E+11	2023-12-27 11:42:49	At the base of a windturbine	None	nope	Make sure all windturbines are close to those who oppose them	none	Invenergy , Landowners , Mickey Mouse

40	1.14497E+11	2023-12-27 11:27:59	My farm	Yes very much so. We need to immediately stop building any more!! They are ruining our country side!!	Not as much as the wind turbines	We have too many turbines now	More thought needs to be given to these as well as the turbines	Anybody that lives in Adam's county should have a stake in this. It's just a money grab for greedy people at the expense of their neighbors!!!!
41	1.14497E+11	2023-12-27 11:20:36	My farm	NO more turbines!!!!	Stop using the best soil in the world for these and the turbines	We made soooo many mistakes when this process started years ago. Stop now and no more turbines!		Any person that has to live by these obnoxious things
42	1.14497E+11	2023-12-27 10:54:18	Nodaway	Yes	Yes	Setbacks	Setbacks	Land owners and acreage owners
43	1.14497E+11	2023-12-27 09:12:11	My home is my favorite place but I love the entire county.	Yes I want no more wind farms in Adams County. We already have too many. It has been devastating to many families in our community already. I have had friends move out of the county because of it. We can't afford to make our agricultural county into a industrial county. Our income is derived from agriculture not wind industry. The stroke of a pen in Washington DC can bring the entire windy energy hoax to an end and then we are stuck with millions and millions of dollars worth of clean up that we can't afford. These farms will never be the same again after this experiment is over.	I want no large scale solar farms in Adams County either. I have been watching the one being built near Creston. It is going to be a disaster for those local people. Those farms will never be able to be put back to the way they were before this.	Every aspect should be regulated. They shouldn't be over 300 feet tall. The setback distance should be measured from property lines. They should be 1 mile setback from property lines. The shadow effect should not be allowed on roadways. This also prevent ice throw injuries. The blinking lights should only come on when an airplane is nearby at night. The sound decibel should be 40 dB maximum. Whoever owns the wind farms must be forced to pay for repairs to roads immediately. There needs to be money already in an account that covers the cost of removing them before they can be built. And that needs to increase overtime as cost go up. This part cannot change when ownership changes. Otherwise these will be left to our counties or landowners expense to remove which is cost prohibitive. Only landowners who live on the property should be allowed to put up a turbine. Once they build next to their house then they can build on other locations as long as 1 mile set backs are kept. This will require them to talk with their neighbors to work together to have them in their neighborhood if they all agree to it. Absentee landowners should not be allowed to participate. This only encourages outside investors (even foreign investors) to purchase land here only to receive a check and not care about what they are destroying in our local community. They need a large area around them to be seeded and mowed weekly to help reduce the risk of fire spreading. No one wants	All aspects. Same as with wind.	Not only every current resident in the county but also all the people who will be inheriting the land in the next generation. This is a problem for many generations to come. The next generation will be forced to pay to remove them after this generation has already spent the money they got from having them. They won't get enough money from selling their parents retirement home down south to pay the cost to remove the turbines when their just sitting there not in use anymore. At a minimum this should be voted on by the voters in Adams county. Something this serious that completely changes how our county looks for generations to come should not be decided by five individuals who are not currently listening to their constituents voices. So much for representative governing. It's been very obvious that the only people wanting turbines to come are the very ones that will benefit financially from them and at the expense of the vast majority that do not want them. There is a word for that and it is not democracy!
44	1.14496E+11	2023-12-26 19:25:38	Our home/farmstead and properties we own	Yes - there should not be any more turbines installed in our county. When are you going to say enough is enough?	Yes - why would you want to remove even more farm land from production? World populations continue to rise & more & more farmland is being destroyed. There will be less food produced.	Put an end to any more turbines and/or no more being put up beginning NOW! Decommissioning - height of turbines - distance of turbines from road ways - measuring distance for a turbine from property lines not from a house.	There should be no more solar farms in Adams County.	All the people who signed the Petition provided to BOS beginning in February, 2023 through current time. It's time to listen to the other people in Adams County - not just the signers. Stop listening to the Wind Turbine people - they are not the ones who live here - the BOS is elected by the people - and you are not listening. The BOS work for us - we the people of Adams County.
45	1.14496E+11	2023-12-26 14:42:42	My home in the country. The lake	Yes. Very concerned about damage possibly to water table, it's impact on soil, impact on wildlife, ruins country landscape, the number of them going up, who pays to remove them, for them, where/how disposed of..how does that impact our soil? How much do they dry out the soil? Heighth restriction. DO NOT want one based on our foundation line. FENCE LINE like all other farming/agricultural decisions are based off. Noise. Blinking lights. This is ALL we get in land and water. We NEED to protect it	Yes. Appearance. Again...who removes and pays for it? Do we as a 'community' get relief from our electric bills? We should!	Heighth. Distance from fence lines only. Number allowed. Water /soil testing periodically. Noise/blinking lights reduced somehow	Basically that which applies from above	? ??? People/towns who have had them? Don't understand question.

46	1.14496E+11	2023-12-26 13:38:58	our home. we purchased this home at auction a couple of years ago and was so happy to not have windmills surrounded by our house. in our previous home, I could count over 60 windmills looking out my small kitchen window.	obviously based on my previous comment. we were drawn to this home because we can enjoy the inside and outside of our home without the disruption of the wind turbines. not just the look of them but the sound, flicker and shadows that constantly surround them.	yes		all of them especially the rights of those who wish not to partake in them.	again, all	your residents, people who actually live in the county
47	1.14496E+11	2023-12-26 12:40:06	Home	Nope	Nope		Set back is fine unless you prefer candles	Are they that big of a problem	Everyone should be heard but it isn't going to please everyone
48	1.14496E+11	2023-12-26 10:30:13	Home	Yes	Yes		Distance to the neighbors house	Distance to the neighbors house	The people they are building them by. I noticed the people that want them don't build them by their own house
49	1.14496E+11	2023-12-25 19:33:04	No Expansion	No Expansion	No Expansion		No Expansion	No Expansion	No Expansion
50	1.14496E+11	2023-12-25 19:24:10	HOME	ABSOLUTELY NONE	ABSOLUTELY NON		DISTANCE FROM RESIDENCE	DISTANCE FROM RESIDENCE	PEOPLE WHO LOOK AT ISSUES LOGICALLY AND NOT EMOTIONALLY. PEOPLE WHO HAVE RATIONAL REASONS FOR THEIR POSITION AND NOT MISINFORMATION DISTRIBUTED BY SEVERAL "ACTIVISTS"

54	1.14496E+11	2023-12-24 09:15:45	Home	They help with property taxes	No		None	Distance to homes	Do not know
55	1.14496E+11	2023-12-24 08:59:57	The beautiful countryside, free from windmills. Where you can see the beautiful skylines, hear the peace and the quiet.	Yes.	Yes.		Distance away from property lines NOT foundational lines. The same safety regulations required for windmill employees should also be required & followed for the closest home. There should also be a cap on how many can be in an area and/or in a county.	Solar farms should be away from people's homes and from the beauty of the countryside. These completely change the landscape; they need to be hidden as much as they can be if they are to go up.	
56	1.14496E+11	2023-12-23 19:22:21	My farm and Lake Icaria	Safety, Setbacks from my property line, Property rights, negative effects experienced by living near a turbine, health issues			Setbacks from property lines and safety regulations		Adams County residents
57	1.14495E+11	2023-12-23 10:54:04	anywhere that I cannot see big money wind towers	yes. County cannot live on "taxing" wind towers for income to survive-thus selling out everything else, for tax money	Yes- money is "our" tax money-that investment corps get free and residents want extra income from other people's taxes		Property values, future now what's, quality and efficiency of wind tower generation, what they look like to visitors, greed for fast money, all residents of Adams county get no benefits and deductions from electricity generated -why? NO EXPANSION	free space- where the people's tax money comes from and goes- quality and efficiency of generation- they don't work- NO EXPANSION	EVERYONE that gets tax payer free money, to make money, at the expense of residents of Adams County, they promise the world too
58	1.14495E+11	2023-12-23 10:36:10	Anywhere I cannot see or HEAR wind turbines!	Adams County is a rural farming community. We are ruining productive farm ground with turbines and solar panels. Especially when our county doesn't even get the use of the electricity they produce.	Same answer as above!		All aspects. This should be set up using input from all residents, not just the few who are pushing for more money in their pockets. Leave the attorneys from the renewable energy out of it and let our county decide what is best for us!	Again, same as above.	Our county residents who have to live with the results for many years to come.
59	1.14495E+11	2023-12-23 09:04:03	Home with our nice view, except on the west side where there are the unsightly wind turbines.	Yes, they are ruining our land. Anytime you pour concrete, it destroys the land.	Yes, we don't need the solar farms either. They take good productive land and ruin it.		They should have to be far away from homes and property lines.	They should be far away from homes and property lines	Every landowner should have a vote to have them or not
60	1.14495E+11	2023-12-23 09:04:04	My farm/property with my home and my unobstructed view.	Yes - not in favor of any more windmills to be built in Adams County * ruining our land/our natural resources * Pouring concrete and cables that will never come out * environment concerns * neighbor disputes/community animosity * property devaluations * increased property taxes * Lack of interest of kids wanting to come back and farm due to windmills- safety concerns * No one wants to build a new home around windmills * Health concerns * Flicker creating problems	Yes - not in favor of any more solar farms to be built in Adams County * ruining our land/our natural resources * environment concerns * neighbor disputes/community animosity * property devaluations * increased property taxes * Lack of interest of kids wanting to come back and farm due to solar- safety concerns * No one wants to build a new home around solar * Health concerns * Need more time for data to be collected to make informed decisions		* Number *Adams County does NOT need to build any more windmills *Height *Lenth of the blades *Property lines (needs to based off of property lines and not a residence) * Light - only comes on when planes around * When this comes to fruition - the landowner and our county supervisors who voted for these things should be on the hook personally to pay to take these down	* Number *Adams County does NOT need to build any more solar farms *Property lines (needs to based off of property lines and not a residence) * When this comes to fruition - the landowner and our county supervisors who voted for these things should be on the hook personally to pay to take these down	* Every voter in Adams County should be able to vote on a ballot whether they are in favor of these "renewable (selling America out to China) energy sources. We live in a democracy. Let the people decide!! Seriously!! I've never seen a more stupid county board of supervisors who don't listen to their constituents!

61	1.14495E+11	2023-12-23 09:25:46	1.What I love most about Adams County Iowa is it's beauty. I love the rolling hills and just enjoying the nature that God created. I LOVE sitting on my porch and watching the beautiful sunsets.	2.Yes, I have many concerns about the windfarms in Adams County. First, they are an eyesore. We still don't know how they are truly affecting the environment, our health, safety, and animal habitat, They are scattered industrialization that is being forced upon some who do not want them. People who do NOT want them will be affected visually, financially, and possibly their health and safety. In addition, I'm concerned that at the end of the windmills life the wind energy companies will weasel out of removing them their land will not ever be returned to the state it was before. They say the farm is liable to remove it then, but that means the taxpayer will once again be held holding the bag. There will be ghost farm windmills that will cloud the landscape for decades.	3.Solar farms are less of an eyesore, because they are lower to the ground, but they take productive farmland out of production. And who will handle their removal when their life is over. I think there will be many other forms of electricity, such as nuclear moving forward and the wind and solar farms will be obsolete in 30 years.	4.Regulation for wind farms should first be at least 1-1 ½ miles from the nearest homestead. However, the problem with this is – it limits future/new homestead sites for landowners. The non-Pro windmill landowner should be compensated for their decrease in land value. Decommissioning costs must be put in escrow, and they must be removed in a timely manner.	5.I am not as familiar with solar farms; decommissioning costs should be put in escrow, and they must be removed in a timely manner.	6.You should interview all county residents. The TOTAL Adams County Comprehensive Plan should be updated, especially since the previous one is at least 60 years old. It should be a slow, methodical process and not done in piecemeal and then ramrodded through.
62	1.14495E+11	2023-12-23 02:54:43	My favorite place in Adams County is being out in the pasture with the cows.	Yes. Several. Setbacks need to be greater so they are not too close to non participants homes and property. There should be hight restrictions. There should be restrictions on the total number in the county as well as in a section or area.	I have not thought too much about Solar farms in Adams County.	Every aspect should be regulated. I am not against them bout there should not be an "anything goes" attitude towards them. Number of turbines in the county should be regulated. Setbacks from non participants property should be regulated. Hight should be regulated. Decommissioning plans should be in place. Both the person with windmills on their property and those that do not have rights.	Not sure.	Anyone living in the county is affected. Even if you own a house or a small acreage near several windmills that property will be harder to sell because it shrinks the pool of potential buyers. This essentially lowers the value of the property. So landowners that have windmills are making more money and neighbors without them are losing money if their property is not able to be sold. Common sense Restrictions required.
63	1.14495E+11	2023-12-22 23:40:58	Lake Icaria	No, I support wind farms and energy.	No, I support renewable energy and believe Adams County should welcome it.	Nothing other than federal / state regulations, particularly on private property.	Nothing other than federal / state regulations.	The general public, who have opinions on both sides.
64	1.14495E+11	2023-12-22 22:34:17	My farm	No	No	Distance from the turbines to a lived in house.	Size	Land owners, BOS, FB , Realtors
65	1.14495E+11	2023-12-22 22:20:48	My country home near Prescott	That there are no regulations for wind farms and no protection for non-participating residents that are near wind farms. No more expansion of wind farms	No expansion	Setbacks from property line especially for nonparticipating owners. No expansion	No expansion	ALL residents but especially those who do not share a property line to those participating in the wind farms but are forced to live within 1/2 mile of any wind turbines.
66	1.14495E+11	2023-12-22 20:05:08	my home	yes	no	number, location, setbacks to other properties, airport,	set backs to other properties	property owners, neighbors, all citizens as they will be effected with taxes

67	1.14495E+11	2023-12-22 14:43:59	My name is Jason King, and my home is my favorite place in Adams County, I also enjoy public hunting lands and fishing locations.	YES! I absolutely do! I don't own much land, at 3.28 acres, in Adams County when compared to many others. MY LAND IS MY HOME! I would not make decisions about my property that could affect neighbors negatively without consulting those neighbors and, if necessary, reforming my plans to meet a compromise. I believe my neighbors would offer me the same consideration. I do NOT believe that an absentee power corporation would even consider my opinion, my home, or my quality of life in any decisions, not now and not in the future. It's difficult to ignore the consequences of windmill generators that are already, in my steadfast opinion, much too close to my home. Cash flow, and remedies for lower than desired cash flow, are temporary situations with many, many options for solutions that don't include selling out the future generations of our families. I've witnessed too many "give them an inch and watch them take a mile" mistakes made to ever be convinced that this is not one of them. Big dollar energy conglomerates are more than capable of building alternative energy monstrosities on their own properties and next to their own buildings. I don't want my legacy to be one of a man that was more interested in money than what really matters. If we let it begin with us, when will it ever end? I do not want my children, grandchildren, or anyone for that matter to inherit an empty, wind swept, weaked field of lifeless dirt	Yes, they aren't being constructed out of sight on difficult land to farm. Adams County businesses bring in good revenue from folks traveling here to camp at Lake Icaria, to hunt, to fish, and it seems like common sense that those travelers will go elsewhere very soon after their wants and needs are no longer being fulfilled in Adams County. Does anyone believe that a family looking for a relaxing time of cooking freshly caught fish over a camp fire that will change to s'mores and scary stories after sunset will come to a place that looks and acts like every other place? I do not. It doesn't take a very long drive to see exactly how areas are affected negatively by big energy that's unwilling to put these same contraptions in view of their own decision makers. Let's let Adams County be the exception, our farms, homes, and natural resources are more important than profit.	100% of all commercial wind farms should be banned.	100% of all commercial solar farms should be banned.	I believe that every rural land owner in Adams County should have an equal voice, along with our local DNR agent.
68	1.14495E+11	2023-12-22 15:03:43	Lake Icaria, City Park, Main Street	No, not a one. Helping with growth for the county.	Not a lot maybe extreme weather.	Reasonable setback for both sides.	Size is a concern.	Comparison to other counties in the state of Iowa. Environmental, Natural Resources, Land-Use Authorities.
69	1.14495E+11	2023-12-22 15:01:00	Happy hollow	No as long as they are far enough away , and they actually pay their way	No as long as they pay their way and made in the USA	Same answer as number 3	Same as 3and4	The money people
70	1.14495E+11	2023-12-22 12:57:54	My home in Prescott Township and Lake Icaria in my camper!	I do not. I believe they are safe, they are a great source of revenue for bridges, roads, and special projects, and they are freedom from foreign sources of energy. I can see them from every window in my home and they do not cause me any issue and I receive no income from them so my opinion is not biased. I think the energy should stay local as much as possible.	I do not. I think the energy should stay local as much as possible. Again I feel like it is a cleaner energy source free from foreign sources of energy. Samsung owns the solar farm I am familiar with and they are based in South Korea. They are not a communist country and they are a more likely ally of the United States.	I think the set backs from existing homes and the decommissioning plans should be regulated by Adams County. I think the energy should stay local as much as possible.	I believe the solar farms have decommissioning plans but if there was a project that didn't have one it should be required. I think the energy should stay local as much as possible.	I think the residents of a proposed wind farm and the residents of an established wind farm. If these parties can not behave in a respectful manner their concerns become less valid. There are many ways to convey a message without harassing our Board of Supervisors and it's advising committees.
71	1.14495E+11	2023-12-22 12:52:58	my farm	visually unpleasant , noise pollution,	if kept to under 3 acres (130,680sq.ft) per site	ALL aspects	size per site, location regarding visual appearance away from traffic and neighbors.. Much easier than the turbines!!!	Renewable Energy Stakeholders should have no say.. Period.. It's completely up to citizens within the county to allow any of it, not even the elected officials/supervisors should decide..
72	1.14495E+11	2023-12-22 12:26:11	My home	Yes	Yes	Quantity, setback from residences, road use, decommissioning, nuisance provisions	Incentive to place on less productive land, setback	All property owners and residents of Adams County, developers, utilities
73	1.14495E+11	2023-12-22 11:23:49	My farm, Lake Icaria, Main Street	No, they are safe, no health concerns, we need them for our county. Revenues will help repair bridges roads. As well as support Lake Icaria	For the amount of land needed to produce that amount of electricity I'm not sure it is worth it.	Fair set backs that don't take the landowners rights away.	Fair set backs that don't take the landowners rights away.	
74	1.14495E+11	2023-12-22 11:11:33	Our farm land	I don't want them	I don't want them	If we don't have them we wouldn't worry about it	If we don't have them we wouldn't worry about it	The land owner should have the right to keep their land for farming so I'd say you should listen to what they have to say
75	1.14495E+11	2023-12-22 11:02:03	Lake Icaria	No	No	Make every aspect of the program recyclable. Withhold funds up front to properly take them down. Make the tax from them available immediately upon construction. Raise the levy rate on them. Double the payment to the land owners.	Same as above.	CEO's, President's, Manager's and Large county Employers of the county business's that have the greatest impact on local economy and use the most energy.

76	1.14495E+11	2023-12-22 10:21:51	My Farmstead	Not really. I don't want to have 500 of them in Adams County but the continue increase of energy needs and strain on our electrical grid gives me great concerns. Not to mention the viability of Adams County and making sure they can provide the same great services I'm accustomed to.	Again i see the need, but i don't like how much land they take up. I could see them on buildings, but to take good farm ground away from growing crops or good pasture from raising livestock when we are tasked with feeding the world seems like a bad idea. But again the need for more energy outweighs this and it should be up to the landowner.	A set back from non-participants that is fair to the land owner who wants them and the non-participant maybe 1500-1800 ft.	How many acres they can take up.	Land owners and rural residents as the people in town aren't effected by it.
77	1.14495E+11	2023-12-22 08:44:56	Main Street	Nope	Yep	Reasonable setbacks from non-participants, that allow landowners the most reasonable use of their property. (Including participants.)	Size	Both participants and non-participants should have their voices heard equally. The board of supervisors and experts in the wind energy field should have the most input into the Renewable Energy Chapter. Not persons with extensive free time and the ability to use google search.
78	1.14495E+11	2023-12-22 07:00:07	The farm land I own and the family farm land in Mercer and Washington townships that belongs to my family and my spouses family are my favorite places in Adams County. The peace I get from being on the land where the previous 3 generations lived and worked is immeasurable.	Yes. There are enough already. No more are needed. Beyond that, the setback restrictions from property lines is a big concern. If my neighbor chooses to put turbines on his/her land I'll be forever impacted but having longer setbacks would help. Negotiations between neighbors for placement would be helpful as there may be impacts on a certain placement a neighbor might not understand. My 2nd concern is the impact on the land now and when the turbines reach their end date and it's the landowners responsibility to remove them. What a mess that'll be.	There doesn't seem to be as much environmental impact with solar farms. I would have the same two major concerns as above but to a lesser degree.	The number of turbines allowed in a section and in the county at large, setbacks from property lines and homes, and cleanup/removal at the end of the life of the turbines should be regulated.	Same as #4	Current landowners of Adams County farmland whether they reside on the land or not should have a voice.
79	1.14495E+11	2023-12-22 06:25:33	My years and view in Nodaway .	Yes! I don't think they're risks outweigh their profit.	Yes! I don't think their risks outweigh the profit!	Every aspect should be studied and evaluated.	The pros and cons of the project.	The citizens that have to look at them, pay for them, and are expected to pay for the upkeep. and see that they are removed properly and carefully.
80	1.14495E+11	2023-12-22 06:08:36	Lake Icaria and my home	Yes the current rules allow for placement too close to homes and that has a negative impact on the home owner.	No	Wind companies are allowed to place them too close to homes. They are noisy.		Residents
81	1.14495E+11	2023-12-21 20:45:30	Our back yard - peaceful and no turbines in sight for wind break trees block the view.	yes, grave concerns - we don't need more, have too many already!	Less concern than new windfarms.	Put stop to any new wind farms. period.	Size, placement	Residents of Adams Co - get their opinions and input
82	1.14495E+11	2023-12-21 18:26:44	Home	Absolutely NONE at all	Same ... Absolutely NONE at all	Don't put them on the roads	Same ... Don't put them on the roads	What Steak Holders??
83	1.14495E+11	2023-12-21 18:20:44	Not one place over another.	No concern	Rather have wind farms. Seen the huge solar farms in western usa. Not a fan	A fair set back for all involved.	Set back only.	
84	1.14495E+11	2023-12-21 17:18:53	I like the country side	I don't want to live near wind farms and would like my land (not just my house) protected	Don't know much about solar farms	Height, sound and set backs (to property lines) should be regulated	don't know	residents and landowners
85	1.14495E+11	2023-12-21 16:49:11	Lakes, parks, rural areas, beautiful countryside.	Yes, many concerns. From individual health, damage to wildlife, damage and potential devaluation to property of those that do not want the windfarms. Long term effects of the windmills when they become obsolete and are left to rot in our county. This will happen at some point since the government funds are keeping the industry alive, once more efficient methods are discovered, they will discontinue funding and the companies that are responsible for the upkeep and dismantling will be bankrupt. Single landowners will not have the funds to pay for their disposal. This is a legacy issue and should not be viewed as short term tax or funding windfall for the county or the landowners.	I do not have the concerns with solar farms since they are generally concentrated in specific areas and do not require hundreds of square miles of space. They also do not seem to have the potential health and wildlife concerns that the wind farms can bring with them. Again this is probably a short-term energy solution in the grand scheme of things and will probably at some point be obsolete.	They should be heavily regulated. There should be a minimum set back of a mile from those landowners that do not wish to sell their legacy to government funded short term energy solutions that will most likely be obsolete in 20 years. I would like to think that those on the board would like to be able to tell their kids and grandkids they stood up to big government and protected their legacy by preserving the land and wildlife far into the future when the wind companies have gone bankrupt and abandoned the county.	All aspects. Even though they don't have the widespread impact on all individuals in the county there are still concerns over proper maintenance and disposal of solar panels.	Every rural landowner in the county is a stakeholder. Individuals that have lived here all their lives as well as those that have moved here to raise a family. Hopefully the long-term legacy that we can leave future generations will override those that view short term financial gains as a reason to ruin the counties natural beauty and resources.

86	1.14495E+11	2023-12-21 16:54:50	MY FARM	YES. No More. MY FARM IN MERCER CENTER IS SURROUNDED BY THEM. THE NOISE, THE FLICKER, THE DEAD BIRDS HAVE RUINED MY FARM. BOS ONLY CARE ABOUT MONEY, NOT RESIDENTS OF ADAMS CO.	Yes. No More	ALL. THEY ARE RUINING THE FARMLAND AND VIEW. VISITORS DISLIKE THEM AND ARE QUITTING COMING TO ADAMS COUNTY BECAUSE OF THEM. MANY SAY NO LONGER COME TO LAKE ICARIA OR TO MAIN STREET TO SHOP.	ALL--100%	FARM LAND OWNERS FIRST. MAIN STREET COMMITTEE, SENIOR CITIZENS.
87	1.14495E+11	2023-12-21 12:51:16	Fishing pond	No. I sure do not want to be dependent on foreign oil.	No	Set back distance, neighborhood consideration	Set back distance, neighborhood consideration.	Landowners
88	1.14494E+11	2023-12-21 11:29:25	My home in the country side.	Yes, many concerns! Too close to home/property lines. Noise. Blinking lights from every angle now! Once beautiful views diminished. Safety. Too many! Don't want to see any more. Valuable crop ground being destroyed in support of turbines. Where will it stop? Danger to wild life.	Depends on where they are going to be located. Size. Noise. Again, crop ground being used to support solar farms.	Size, location, cap on how many. We need to stop at 121 turbines before we totally destroy our county. We need aircraft detection lights to help with the nighttime blinking red lights. Height caps. Bigger set backs. 1200 feet is too close to our homes and property. At least 3200 feet from property lines. Decommissioning Plan.		
89	1.14494E+11	2023-12-21 11:23:10	all of rural Adams county	yes, the expansion of wind turbines and the BOS not listening to the people	not as much as the turbines	no expansion	no expansion	the people living in Adams county
90	1.14494E+11	2023-12-21 10:50:41	CORNING	NO	NO	UNSURE	UNSURE	LAND OWNERS AND RESIDENTS
91	1.14494E+11	2023-12-21 09:31:35	The beautiful country landscape. I have always loved seeing nothing but farm land and nature. It surely is not south of town. The noise those things Make are Maddening.	Yes It is ruining the views. A lot of people move to the country to get away from that kind of view. I may have to leave another rural area again because I don't want to see these, or the red lights at nights. I think we have enough.	Yes, I believe this is going to impact our small rural community badly. I have family in California that lives by these and they no longer can grow plants, grass in their yards anymore. My cousin has had no luck using the ground around her home for nature. She has lived near these for over 15 years. Their utilities are higher than they should be and she has dirt and rocks for a year.	I think all aspects should be regulated in Adams County. I think we have enough of them. If big wind companies want more wind energy they can find it in states that are not agricultural. Like Wyoming, or someplace that no one in the country depends on our corn, and hogs for life.	I think all aspects. I feel like this is going to be a bigger problem in the future. These wind farm and solar farm people don't tell you everything. They keep their people who are in a contract with them on a gag order; and the people who buy land from the original owner of land they are on a gag order. I would say just ask them but they could not tell you. Hint the gag order.	well anyone who is a stakeholder is not going to speak out against what the county is doing. So you can ask and talk to them all you want and they are going to paint roses on everyones butt, to make it the bigger better deal, when all they are after is to more or less take and never give back. I think with all the people who have come forward and spoke their opinion on the matter who HAVE TO LIVE BY THEM or do live by them, that have had issues with them, should be asked and all questions answered. Yet we can not be asked questions, or even speak on the matter due to the gag order that is in the contract paperwork we sign and did not realize was there. So we have to stay silent, and watch as our beloved county and home gets over taken by these windmills that drive some of us crazy with the sound waves they put off. I no longer live in the country outside of town due to the noise they make. I can't take it, it drives me crazy. Even driving by them with my windows down the noise hurts my ears. It's not fair I have to be in town now due to them. I think people are greedy and want the money they offer, but money is not worth the price we pay to watch one of the most beautiful counties go to ruin over money and windmills. It is really sad you have landowners wanting the money and not realizing that there is a cost that just is not worth.
92	1.14494E+11	2023-12-21 08:22:58	The acreage where we live	Not\ne that I can think of	None that I can think of	The distance from a wind turbine to a residence located on property not owned by the person where the wind turbine is located. I do not know what the distance should be.	The distance from a solar farm to a residence located on property not owned by the person where the solar farm is located. I do not know what the distance should be.	The stakeholders are the residents and tax payers in Adams County that want Adams County to grow and thrive. County services cost money , money comes from taxes. wind turbines and solar fields bring in tax dollars. At this time there is not a better opportunity to get the tax dollars. I don't know by name who these stake holders are but residents and tax payers need to understand the choice's when it comes to generating the tax dollars for the county to maintain a posive trajectory.

93	1.14494E+11	2023-12-20 21:13:40	Lake Icaria	I don't want a wind turbine within 1500 feet of my property line. I have an acreage, as does everyone on my road, and I want to be able to build a house on another piece of it for us as we age and have our kids live in our current home. If the distance is only from current buildings then I won't be able to build elsewhere on my land	Just that they should be the type where the tax money goes to the county	Distance from property lines so they don't affect their neighbors' land and impact their ability to sell. Also there should be a fund and a guarantee that when the turbine is no longer in use, it is removed by the company, not the county or landowners	When no longer in use, the company must remove the parts and restore the land	Residents
94	1.14494E+11	2023-12-20 21:10:53	Icarian Village	None	None	Distance from houses but reasonable, not crazy distances that will kill the projects	Same as previous answer	Young people- their county, their future...taxpayers who will undoubtedly benefit should these good projects be approved and should be
95	1.14494E+11	2023-12-20 21:09:41	The land.	Yes	No expansion	No expansion	No expansion	No expansion
96	1.14494E+11	2023-12-20 19:36:06	Our farm near lake icaria.	Yes, the aesthetics, the fact that there won't be any bees or birds (from experiences with friends near them), the noise (there is noise associated with them), there is no lowering of the electric bills (we don't benefit from them).	Far better than wind mills but will Not support them since there are no direct benefits locally.	All of them. No more needs to be added to our area.	All of them. Hard to get rid of old or broken panels.	All residents of our community are stakeholders. Let the renewable energy technology continue to develop instead of forcing on the community.
97	1.14494E+11	2023-12-20 17:58:08	Lake Icaria	No. Need more renewable energy.	No. Need more solar farms & renewable energy	Setbacks from houses	Unsure	Property owners where projects are constructed
98	1.14494E+11	2023-12-20 17:47:04	My home.	Yes! We are surrounded by windmills as it is. No expansion please!	No expansion please	All. Property owners have no rights. We have lost our TV reception because of windmills. No expansion!	Same as above. No expansion!	Property holders in Adams County. We pay taxes and YOUR salary. Represent us! Don't ignore us!
99	1.14494E+11	2023-12-20 17:47:52	MY HOME/FARM	NO.	NO. I WOULD LIKE TO SEE MORE SOLAR FARMS BE CONSTRUCTED.	UNKNOWN	UNKNOWN	UNKNOWN
100	1.14494E+11	2023-12-20 15:52:43	My home in the country, where I do not want any more expansion of ANY wind turbines or solar farms, PERIOD!!	I am very concerned!! These wind farms are not electrically beneficial to anyone in our County and are not a reliable source of electricity at all, therefore I vote for No Expansion. We do not want them here!	Yes, solar farms are the same and as bad as wind turbines for reliable energy and non-beneficial for Adams County residents. They all pollute the view and should be allowed no further expansion at all.	They should pay DNR Hazmat fines for any and all the gear oil that is leaking from the existing wind turbines. It should be mandatory that any current and future wind turbines that are built, have an automatic fire suppression system installed. Better yet! No further expansion of wind farms in Adams County is the correct answer.	No further expansion of solar farms in Adams County. It just clutters up the countryside. They don't work very efficient when the sun don't shine, unreliable for the consumer.	I suggest Chuck Soderberg, executive vice president and general manager of the Iowa Association of Electric Cooperatives. Randy Feenstra, Congressman representing Iowa's 4th District.
101	1.14494E+11	2023-12-20 13:01:19	In the country.	Yes, I believe they are taking excellent farmland that should be used to produce food for our country. The longevity of farmland production far outweighs the short-term use of wind turbines on that land. Also, I have concerns about interfering with aquifers in SW Iowa due to the depth of the turbine's base.	The longevity of farmland production far outweighs the short-term use of solar farms on that land.	How close the turbines are to a non-participating person in the county. Good fertile farmland should not be used for wind farms, look for land that is not beneficial for farming.	Good fertile farmland should not be used for solar farms, look for land that is not beneficial for farming.	People who have to deal with the effects of turbine farms or solar farms firsthand 24/7.
102	1.14494E+11	2023-12-20 14:46:00	our home	yes. We're concerned that noise, lights, shadows and interference will ruin our rural setting and health.	yes. We're concerned about the deposal of panels at the end of their lifespan.	Distance from property lines. Height cap. Quantity cap. Shadow on residences. Removal plan. Sound regulations. Electromagnetic enforcement	Removal and disposal plan	Adams County residents.
103	1.14494E+11	2023-12-20 14:48:48	Our acreage	Yes. How they will negatively impact our quality of life. Also a completely unreliable and costly source of energy.	Yes. An unreliable source of energy that permanently alters the land.	Set backs at least need to be near 3000 feet. Also, so many farmers no longer live near their farmland, but thise they sold the houses to aremost impacted.	These are even a greater eyesore and unreliable. They have a negative affect on the land they are installed on.	You need to co sider the home owners, not just land owners. They are the ones most impacted with no benefit.
104	1.14494E+11	2023-12-20 14:12:08	Lake Binder and Lake Icaria	No	No	They should be regulated to pay tax which would lower the amount of property tax paid by residents.	They should also be a tax income stream for Adams County alleviating property taxes	?
105	1.14494E+11	2023-12-20 12:00:05	No expansion	No expansion	No expansion	No expansion	No expansion	No expansion
106	1.14494E+11	2023-12-20 11:14:53	We keep expanding wind farms, there will be no favorite places left in Adams County.	yes	yes	No more expansion of windfarms. You need to pay attention to all the concerns other counties and citizens have raised in addition to Adams County residents and slow down. More underground obstacles makes it harder and more dangerous for the farm conservation contractors.	Worry it will take out too much of our productive farm ground. Ground contamination from the panels. There is alot of tile in Adams County and there will be no way to maintain and repair the drainage system and maintain the farms conservation practices that have been put in place.	
107	1.14493E+11	2023-12-19 17:26:35	My home and it's peace and quiet outdoors and able to hear nature and it's habitat	Yes they do not belong in sw iowa. They will bring traffic , noise, they do not benefit us iowa redirects, they're an eye sore.	Yes, they don't belong in Iowa, leave our ability to enjoy peaceful scenery as it is	Them not be in Iowa, do not bring farms into sw iowa communities or country acreages	None i don't want them at all	No one

108	1.14493E+11	2023-12-19 16:42:38	My little farm	They are: unsightly, kill birds, and noisy.	They are also unsightly. They ruin the bucolic landscape.	They should be abolished. Not regulated	Also should be abolished.	Land owners
109	1.14493E+11	2023-12-19 14:57:12	My home. WE have simple acreage and sunrise and sunset views. location is important. We have great internet but this is an issue the county needs for everyone to increase job opportunities.	There are concerns with what already here. Yes, I have concerns. Placed a mile from a home is too close! Digging so deep and what do for water aquifers, flicker and noise especially for non participants and no one take responsibility to help. I don't see them as energy efficient, and have not decreased our electricity. Our Zoning weren't working on this years ago. The community has been heavily conflicted now. Sad. I saw see red lights., some are 20 miles away. As they are making them taller, holes dug deeper, sound and flicker will be worse. STOP!	Hate them! ugly and should not be in view of a homeowner, especially if not near the landowners home. so not mine! inefficient	that we have enough already. No more! They are obsolete and coal is used to make them.	put on non productive ground and away from homes, way away! inefficient.	non participants, people who are not getting any money, rural home owners especially.
110	1.14493E+11	2023-12-19 11:20:49	My home	Yes, A 600ft industrial turban within a mile of my home is likely to be noisy, could create flicker, disrupt my internet (fixed wireless) and reduce my home value. I would like the Board of supervisors to find some reasonable balance in zoning regulations that protect all	I pm not sure a solar farm would impact my home but seems like a foolish use of our highly productive ag ground	My property boundaries should be protected. If I want to build in the future I should be able to. My neighbor should not be able to set a turbine in locations that impact how I can use my land	Same as 4	Residents and landowners. This survey would appear to be a very poor way to really gather data. Are you serious about learning what residents and landowners think or just going through the motions to pacify those that disagree with the board of supervisors
111	1.14493E+11	2023-12-19 08:57:29	Peaceful, people, simple way off life.	Yes, Short sided thought process. No one wants these. The whole world is moving away from these things... why are we entertaining these	no. but instead of an industrial farm where the power goes out of town, why not tax credit individuals who choose this form of energy.	all. height. You bad Idea for the future of Adams County	waste of money & time	no one in Adams County because all the power will go to the city, but we are the ones that have to look at these non-natural towers
112	1.14493E+11	2023-12-19 08:49:27	lake icaria	No, the new ordinance will alleviate any concerns	No, the new ordinance will alleviate any concerns	decomissioning, lighting, road use	decomissioning, storage batteries	Adams Co. Conservation Bd. - accb@adamscounty.iowa.gov Adams Co. Supervisors - shiple2@myfmtc.com
113	1.14492E+11	2023-12-18 19:37:09	My home and outdoor spaces we have invested in, developed and crafted lovingly the past 30 plus years ...to enjoy our family, grandkids, and neighbors the last 10-30 years we may have on this earth. We have stopped dreaming about our future life in Adams County Iowa. Turbines are a deal breaker for us. I have come in front of the BOS ,may times but they do not appear to hear the constituents who feel betrayed that our county has become an increasingly industrialized turbinepalloza county with seemingly little to no constituent input. I am done begging to be understood. I do not want to move after 30 years but I am tired of hearing of local people who have had to move to get away from the turbines,,and now the turbines threaten them again. There is no safe place in Adams county to settle. We have no doubt our home will lose value greatly if the turbines keep closing in. Thus, I live a truly truly much less happy life, as I am in limbo and out of control about my own homestead and where I will be able to live comfortably the next 10-20 years until a nursing home or death. The BOS is underestimating the suffering of its people from the stress of being "mined" constantly, fueled by unthoughtful tax incentives which would obviously cause chaos in our community. So much for taking a gamble on Adams county 30 plus year ago, growing a nice large family of good citizens and greatly contributing to the economic and welfare of the area. I am tired of hearing of more and more	Yes, read above.	Yes, we are the breadbasket of the world. Blanketing our precious ag land our forefathers taught us to respect and conserve with our full measure of respect seems short sighted and a land grab by non-governmental agencies.	Admit there IS internationally respected research on infrasound by experts as close as Winterset by Ben Johnson. Why do our local governmental health agencies ignore and not comment or discuss. The concept of the "trespass zone" is a real "thing" and needs to be respected and acknowledged. Nightly Flashing red lights are highly distracting and irritating to the majority of your constituents. A process to respect and deal with the loss in property value incurred by non-partipants. It is happening and will just snowball out of control. Setbacks need to be from property line. There thereto be limits on height. The higher they go, they become even more disruptive to the local community. Personally, I feel Adams county has given up enough already and we need to consider holding the line at 121. These 121 were put up with little public input, little transparency and with many conflict of interest concerns through the years. Much more respectful setback if we must have more. Decomishing is a major concern that we the taxpayers will be dealing with the aftermath as turbines become outdated. Insurance company experts in our area are saying the wind industry is tanking. Businesses are getting out of the business and insurance rates are going to become a very expensive additional consideration for the owners.	A full comp plan should happen before we consider adding more wind and solar. Lets do it right instead of pushing things through in a hurry as we seem to be doing unlike surrounding counties. It's a mystery why we are being treated so very differently and unkindly by our own elected officials.	Constituents first should share a vision moving forward. Not amend an old Comp Plan. Once the vision is made, then bring in the companies. It has been backward all along. IMO Hoping to stay put in Adams County but not counting my chickens. You have a captive electorate...here's a chance for our BOS to leverage it in a positive manner to work together for our county's future vision. DO it better! DO it right!
114	1.14492E+11	2023-12-18 19:12:58	South of Cromwell in Union twshp.	Yes , we are surrounded by them. We think we have enough.	Yes,	Distance from our homes and a disturbance in our ecosystem.	Keeping our rich farm ground in production of crops	Homeowners and residents of our county
115	1.14492E+11	2023-12-18 18:03:13	Beautiful rural yes landscape	Yes. I feel they are not efficient and take away from any we choose to live in a rural area. I am concerned how they affect the health of people and animals.	As long as they are efficient and don't affect livestock or natural habitats.	The number, how close they can be built to other people's property	The total number of how many and where they can be built	Lawyers, insurance agents, real estate brokers, veterinarians, medical field, property accessor

116	1.14492E+11	2023-12-18 13:34:06	The farm I live on!	I certainly do! We have too many already. Enough!!	Yes, too much of anything is not a good thing.	Setbacks, height, number of them. They are a big scar over our beautiful, God-given black soil we have on our Iowa farms!	Stop taking good acres out of production and plastering these all over.	People who truly care about our land, the beautiful rural Iowa scenery we have...not just money grabbers!
117	1.14492E+11	2023-12-18 12:46:23	My home.	Yes.	Yes	Farther distance from property lines and homes. Or not put up at all.	Farther distance from property lines and homes. Or not put up at all.	
118	1.14492E+11	2023-12-18 12:46:14	The area that I farm, which is where I grew up.	Yes. I think they are too close to neighboring homes and property lines.	Yes. I do not want to see them in the area.	At a minimum, the distance from property lines and homes should be increased.		
119	1.14492E+11	2023-12-18 03:06:21	All of Adam's County! Love the nature and agriculture! We have enough wind Turbines!	Absolutely! They are too close to Homes we need a mile from property lines and a cap on amount and height.	Of course! Lots of land for little output! Single Solar panels on houses are a better choice	Amount, 250 are 100 too many! Height should be regulated! Distance from property lines should be one mile.	Locations! And size!	Every citizen in Adam's County! We need a longer Moratorium! We need more research on both Wind and Solar.
120	1.14491E+11	2023-12-17 22:06:37	My home	I'm concerned that a loud, obnoxious minority of residents could overwhelm the rights of farmers to harvest wind energy, and in so doing, deprive this county of desperately needed jobs, private income, and tax revenue.	See above. I would like to note that it is my understanding that, due to vagaries of state tax law that I can't explain, solar is less advantageous than wind in terms of tax benefits.	I'm not opposed to reasonable setbacks designed to ensure safety. Aesthetics do not justify regulations in my opinion. Generally, you can't tell your neighbor not to build a shed or lot or building that you consider "ugly", and that's a good thing. Personally, I think windmills add aesthetic value to the landscape.	See above.	The stakeholders are every resident of the county. They don't need interviewed as much as educated about how windmills dilute the property tax liabilities for all county taxpayers. I think there is a misperception that the costs (noise/ eyesore) are generalized while the benefits only flow to a few. I doubt most people are aware how much their taxes would HAVE to increase in the absence of wind revenue. We may not all benefit equally, but we all benefit. I'd also encourage folks to drive around the county and check out the crumbling bridges that we can't afford to fix before they decide whether wind is worth it.
121	1.14491E+11	2023-12-17 20:47:07	The farmland view without red blinking lights.	Yes, absolutely do not want them! They cause more damage than good.	Yes, again it does not benefit the overall people of Adams county. Only a few selected would benefit.	There should not be any.	No expansion, no wind farms.	Adams County Priceless Land Coalition
122	1.14491E+11	2023-12-17 19:19:15	No Expansion	No Expansion	No Expansion	No Expansion	No Expansion	No Expansion
123	1.14491E+11	2023-12-17 16:40:40	Lake Icaria	Reasonable setback for all parties	No	Setbacks and aircraft lighting	Setbacks from neighbors	Land owners who are participating and neighboring affected land owners who are non participating
124	1.14491E+11	2023-12-17 14:54:46	My home	Yes	Yes	There should be no turbines - no expansion	No wind turbines. They ruin the opportunity for land development and natural earthy developments and resources.	Adams County landowners. Please!
125	1.14491E+11	2023-12-17 14:03:02	Our farm/home	Yes. Absolutely.	No.	Distance from a residence. Distance from property lines.	Distance from a residence and property lines.	Adams County Landowners.
126	1.14491E+11	2023-12-17 13:29:06	Home	Yes	No	Distance from homes and neighbors. Destruction of land-won't be productive. Dangers to our health and livestock. Lack of honesty in county officials and big money corporations forcing us to live with the consequences of their agenda.	Location and numbers	Us, the residents who have to live here and been here for generations.
127	1.14491E+11	2023-12-17 01:31:13	The view from my all season room	Yes	Yes	Proximity to property lines. The amount of area they cover, no industrial scatter, land should be utilized for agriculture. This is not the best energy source and we need to look far into the future for what is best for future generations.	Proximity to property lines. The amount of area they cover, no industrial scatter, land should be utilized for agriculture.	Someone in the nuclear power realm as it is the cleanest and safest option, this is the future.
128	1.14491E+11	2023-12-16 16:19:32	The view from my home, rural areas, and any of the public parks.	Yes, there should be a limit on the number and height of the wind turbines. The energy created from the ones already constructed has not lowered energy cost for residents of the county. Why would we want more? The end of life removal should be a concern. The location in relation to a residence should also be looked at.	At the December 11th meeting it was stated that solar farms liked to be placed in level areas, this would require the use of the best farm ground in the county. Why would a farming area want to do that? Size, location, effect on wildlife, and decommissioning are concerns.	Size, number, location in relation to a residence, and decommissioning.	Size, number, location in relation to a residence, and decommissioning.	Landowners, real estate agents, insurance agents, bankers, and school leaders. Will adding more wind turbines benefit the idea of the school being a destination district and encouraging people to move to Adams County.
129	1.14491E+11	2023-12-16 16:55:45	Sweet desires	Yes	Yes	None	None	People that live near them us
130	1.14491E+11	2023-12-16 16:38:59	Our home	Yes, we are near adairs, they are noisy.	Sacrifice farm ground feeds world	Non participate 2 miles, maintenance vehicles must by fuel from county generators are in to pay road taxes for destroying roads that were hardly traveled before	Put on unformatted land without clearing trees	

131	1.14491E+11	2023-12-16 10:34:07	Peace, the lake , fish & people	Yes Many	Yes... why be short sighted about our long term future	No wind farms,, short term thinking	All.... None.... As our world changes & more families move back to rural communities due to remote working... these wind turbines will only benefit the few & down grade our whole community	Don't interview anyone from Adams County... long term eye sore, short term benefits for the few!
132	1.14491E+11	2023-12-16 09:50:21	Lake Icaria	Yes	No	Distance from property lines and height.	Keep small enough to not endanger birds	The residents
133	1.14491E+11	2023-12-16 09:40:43	The country.	Yes, they are thankfully 3 miles from us, but the noise and lights are unreal. Young families will not move back and build. Where can they?? No expansion! We have enough the way it is.	No expansion	Adams county BOS do not care..... set backs are so important for living in the country. Zoning board have illegal members on it. NO body cares. NO EXPANSION	Once again...BOS do not care and have shown that. NO expansion	The people that live in the country. Listen to those who have concerns. Other counties care....why can't ours? NO MORE RENEWABLE energy "farms". NO Expansion
134	1.14491E+11	2023-12-16 08:45:07	My farm	Yes	Yes	Distance from homes/ neighbors/ and the number in the county/ the implied income and it's use/ how to dismantle them and payment.	Same concerns as listed above.	The people who live daily around them and future neighbors as more are built.
135	1.14491E+11	2023-12-16 08:36:50	My home	No new turbines	No don't mind them	All. No new turbines	All	The people of Adams co
136	1.1449E+11	2023-12-15 21:48:50	My home	Yes. Already too many.	Not sure	Distance from homes Number total	Not sure	Home owners
137	1.1449E+11	2023-12-15 21:12:05	My home.	Do believe they are getting too close to homes especially mine. Believe we need alternative energy but it is destroying the beauty of the country.	No there are many plenty of poor sections of land that could be used for solar.	Distance from living quarters and what be happens to the turbines when they break down.	Don't know	The land owners.
138	1.1449E+11	2023-12-15 20:27:35		There should be no more wind turbines	There should be no more solar farms			
139	1.1449E+11	2023-12-15 18:42:36	Home	Yes.	Yes	Should not allow any more.	Should not allow any more	Any farmer who hates them.
140	1.1449E+11	2023-12-15 18:34:53	Home	Yes	No	All aspects	Most aspects	County Supervisors , Governor, members of the state house of reps, our 2 senators, etc.
141	1.1449E+11	2023-12-15 18:14:42	My home and surrounding area. Adams county countryside.	I have many concerns!	Some but far fewer than the number of concerns I have with the wind farms	Distance from property lines of homes. Noise level from wind turbines. Number of wind terms allowed.	Number of solar farms allowed. Distance from property lines of homes.	The biggest stakeholders are truly the rural residents of adams county as its tmtgeir land, their homes, their views from their homes, possibly the impact to their property value, and definitely the impact to the quality of rural life they planned on when purchasing their property. They have the most at stake in this!
142	1.1449E+11	2023-12-15 18:06:07	I love all areas in our county. Farmland is most important to me.	Yes	Yes	No expansion please	More information needed	Adams county landowners and citizens
143	1.1449E+11	2023-12-15 17:45:28	My home	We already have enough 121 and the setbacks only benefit the participant	Consume our Ag land.	Set backs from property lines of a minimum of 1/2 mile	No solar farms	The residents and landowners of Adams county. Not outside energy companies and lobbyist
144	1.14489E+11	2023-12-14 21:08:50	My farm	the blinking red lights at night	No	The total number allowed in the county.	Not sure	Landowners who have the option to lease their land for renewable energy.
145	1.14489E+11	2023-12-14 15:17:11	my property	ABSOLUTLY, very strong feelings there should be NO MORE built and plans should be made for the disposal of existing ones. They will become obsolete soon just like the EV's.	ABSOLUTLY, very strong feelings there should be NO MORE built and plans should be made for the disposal of existing ones. They will become obsolete soon just like the EV's.	Poor use of valuable farmland, destroying the beauty of the land, an eye sore, blinking red lights makes me very sad to see the destruction of Adams county for short term money	Never in view of neighbors that do not want solar farms	All property owners
146	1.14489E+11	2023-12-14 12:15:25	Lake Icaria	I am concerned about wind turbines overwhelming and dominating our skyline. I also am concerned about there not being enough money allocated to decommission the turbines. It is of the utmost importance that the turbines will be set back far enough from the property line of landowners who choose not to allow turbines on their land.	No	Setbacks from property LINES. Cap on total number per area. ADEQUATE decommission plans.		Land owners in Adams County
147	1.14489E+11	2023-12-14 12:15:45		Yes. I am concerned about the lights, noise, and the future. I am worried about what we will do with turbines in 20 years.	No, not really.	Tear down must be funded 100%, must be more than 1,500 ft from property lines, I want to see lights triggered by nearby planes.	Glare, water consumption, removal, the amount of heat generated.	Realtors, property owners, current people impacted by the turbines
148	1.14489E+11	2023-12-14 11:34:55	Several places. Home (rural) & Lake Icaria are top 2.	Yes. And as equally important, those on the Board of Supervisors as well as those on the Zoning Board willing to turn a deaf ear to the overwhelming majority of voices of the landowners and residents in voicing their legitimate concerns.	Yes, just like wind farms, I would be concerned if a large industrial company came into our county, pitted neighbor against neighbor over industry in rural areas, shredded the farmland, and then left everyone else to deal with the cleanups of relationships and also land.	Safety setbacks for non-participants equal to safety setbacks in place by wind farm companies. Quantity of turbines allowed in the county.	Also proper setbacks from rural residents. Quantity of solar projects and location.	The residents and landowners of Adams county.

149	1.14489E+11	2023-12-14 10:29:10	The countryside and open fields. I love the lakes and Main Street	Yes! They are an eye sore to this area. I understand having a few but we have much more than that and we don't need any more!	The one by the industrial park is fine and maybe a few more there would be fine too. I do not want our entire landscape to be filled with industrial. They put off heat and radiation so should not be by homes.	I think we need a larger deposit on the front end to cover expenses. They don't fulfill in the end. I think they should be required to provide safety equipment and training to our EMTs and our firemen. Both of those entities are always in need of more money. I think that, we need more oversight and I think that the contract for tearing them down should be updated every year due to inflation. I believe we should hire someone with the sole purpose of oversight and regulation of these wind areas. Their job would be to go around on a weekly basis to make sure that there are no safety or security issues going on that have been overlooked by the wind company. And more regulatory measures need to be put in place for the roads. I also believe they should be required to spray the roads to limit the dust during construction. We need a cap and the cap should be where we are right now. We don't need any more turbines in this area. Property, lines and ownership needs to be protected and not overlooked. And going forward any wind turbine should be no closer than a mile from a house.	I believe we should limit the amount of acres that can be used for solar. I think they should be required to be at least a mile away from home. All the answers I gave her above should be addressed for solar as well	Community members. This is a very small survey. We need to dig deep and ask more questions and take more time to find out what the taxpayers in this community want and don't want in Adams county. I believe we need to take our time and dig deep not rush this process.
150	1.14489E+11	2023-12-14 10:14:48	My home.	Yes, I feel they will destroy our beautiful area.		set backs and the number of them This whole process has been done backwards. The ordinances should have been reviewed and revised before the first wind turbine was ever allowed to be built.		Any Adams County Iowa RESIDENT landowner.
151	1.14489E+11	2023-12-14 09:49:50	Lake Binder or country club to golf	No	no	I think there should be a cap of wind turbines in the county		
152	1.14488E+11	2023-12-13 16:20:13	Lake Icaria	no	no	total number allowed to prevent oversaturation	overall size of footprint	community leaders and all residents of county
